LLPOA Newsletter

Purpose of this corporation is as follows:

- ✓ To organize the property owners within and adjacent to the shores of Loon Lake Stevens CO, WA.
- ✓ To protect Loon Lake from environmental degradation
- ✓ To provide a forum by which the property owners may assist government agencies in better planning the use and resources of the Loon Lake Area.

# LOON LAKE PROPERTY OWNERS ASSOCIATION

## SRING/SUMMER 2019 NEWSLETTER

### President's Message

By Lee Evans

First and foremost, I want to thank both our board and general members who donate their time to make our activities and events happen. Moreover, I want to emphasize how important it is that we continue to get some new help each year, so we don't burnout the people who regularly volunteer their time. If you would like to make a difference and help your community, please consider volunteering there are MANY ways to help!

The water quality team meets three times a season and monitors the health and safety of our lake water and watershed inlets. The Dock Demolition efforts on June 22<sup>nd</sup> to remove old and abandon dock from the lake and wetlands. The Loon Lake/ Deer Lake Property Owners Association Chipper Day on June 1<sup>st</sup> and October 19<sup>th</sup>. The LLPOA July Fireworks program. The July 4th Boat Parade. The Bi-annual LLPOA newsletter. All are looking for and needing volunteers. Please let us know if you have any special skills or a little extra time.

Association Membership: During 2018, the LLPOA had approximately 300 members of nearly 600 lakefront and secondary properties. Annual membership runs from June 1 to May 31. Membership renewal and donation envelopes are sent out with each newsletter annual dues are \$20. When members advise the Association of property sales, new owners are contacted and provided information about the association. If you have neighbors who are not association members, please encourage them to consider membership.

Annual Meeting: Friday June 28<sup>th</sup> 7:30 pm. The location is the basement of the Old School House. We will have coffee, juice cookies, door prizes and guest speakers. Your attendance is important we continue to struggle with a quorum at this meeting.

The LLPOA is dedicated to the protection and conservation of Loon Lake, its shoreline communities, wildlife, fisheries, and recreational opportunities. Through education, awareness, and collaboration, its officers and members strive to unite our community, local and regional agencies, corporate partners, and government entities, to preserve and enhance the lake and habitat. Using monitoring and research efforts, the association makes recommendations for the future benefit of Loon Lake, its residents and its many and diverse recreational users.

Your LLPOA Directors and Board Members: Lee Evans Pres, Jim Davies Vice Pres., Jane Sprague Treasurer, Debbie Cornwell Secretary, Barry Smith, Dick Davies, Mark Whittaker, Don Kelley, Holly Shamberger, Dana Waddell and Jon Hastings.

### Treasurer's Report

*Jane Sprague, Treasurer*

*Fiscal Year 2018*

*(June 1, 2018 to May 31, 2019)*

As always, the membership of LLPOA has been very generous. It is due to that generosity that LLPOA can continue its many fine programs such as the annual fireworks show, water quality monitoring, and Chipper Days.

The items of greatest interest are listed below. Please note that this report covers the 2018 fiscal year.

We thank you very much for the support you provide for *your* community!

Checking	\$24,872.19
Savings	5,514.52
<b>TOTAL</b>	<b>\$30,386.71</b>

Membership	<b>254</b>
------------	------------

	<i>Income</i>	<i>Expenses</i>
General Contributions	\$1565.00	
Dues	\$4000.00	
Conservancy	\$270.00	
Fireworks	\$4496.00	\$7100.00
Dock Demolition	\$1007.00	\$4703.47
Pancake Breakfast	\$3116.05	\$2103.15
Water Quality	\$580.00	\$2316.86
Chipper Days	\$367.00	\$250.00

## BEST AVAILABLE SCIENCE NOT YET AVAILABLE FOR LOON LAKE MILFOIL

---

By Lee Evans Loon Lake LMD Chairman

Over the last three years the Loon Lake Lake Management District under the direction of Stevens County has been working with the Washington State Department of Ecology following the guidelines of a Water Quality Aquatic Invasive Plant Funding Agreement (Grant). DOE's Overall Goal for this grant is **"To maximize efforts to identify and implement the most effective treatment for this new, hybrid strain of watermilfoil on Loon Lake and prevent its spread to other regional waterbodies."** Final Task #5 of our grant is a lake wide application with the suggested herbicide from grant Task #3 and 4.

It has been determined (from grant task 3 and 4) the Best Available Technology is a chemical called ProcellaCOR. Some of the benefits include, lower costs low volume use rates. No Swimming, fishing or human potable water restrictions. No turf irrigation restriction. This herbicide is a systemic product that is selective for Eurasian Milfoil and hybrid strains of aquatic weed. Reduced Risk herbicides are a new class of products recognized by EPA in February of 2018. The US EPA issued registration of ProcellaCOR the new reduced risk aquatic herbicide to this category because it has a better environmental profile than current registered products. It also has the fastest uptake time of any of the aquatic herbicides available which was also proven in our study, making it more effective in high water exchange environments. Applicators have been able to use this technology for over a year in other states. In addition, 1 or 2 pints of this product replaces between 200 and 400 pounds of 2,4D reducing the amount of herbicide needed.

Ecology felt however that the NPDES permit required an amendment. Initially, the Department was going to delay amending the permit until the next permit cycle some years in the future. After considerable public input to DOE, last summer agreed to move ahead with a permit amendment. The public comment period on this closed in December, over 4 months ago. This permit was promised to be available for use in May of 2019. We recently found out that because of priorities within the Department it will be delayed until July 5<sup>th</sup> of 2019 maybe longer. The original May approval would have allowed the LMD to complete the grant requirements and meet the June 30, 2019 deadline.

Stevens County Commissioner Wes McCart has been very proactive in his efforts to help resolve this bureaucratic delay by enlisting the support of our District 7 state legislators Shelly Short, Jacquelin Maycumber and Joel Kretz. Stevens Co. Commissioner's office has also completed and submitted a formal request to DOE to extend the deadline of our Water Quality Grant in the event the Best Available Science will not be available in time. At this printing no Loon Lake Milfoil herbicide application date has been determined.

## WATER QUALITY MONITORING PROGRAM COMMENT ON STEVENS COUNTY SHORELINE MANAGEMENT PLAN UPDATE

---

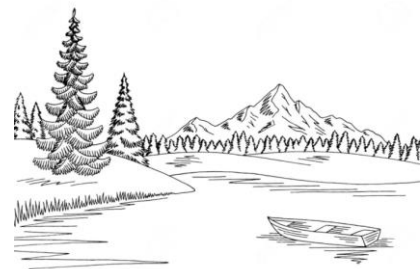

By James L Davies

LLPOA WATER QUALITY MONITORING PROGRAM

In 2006 the Loon Lake Property Owners Association, with technical help from the Washington State Department of Ecology, developed a water quality monitoring program for Loon Lake. Equipment for the program was purchased through a Washington State Hussian grant of \$10,000. Training of participants was done by the Washington State Departments of Ecology and Fish and Game. The program measures temperature, conductivity, Ph, dissolved oxygen, nutrient levels (phosphorus and nitrogen compounds), and water clarity in the water column. Forays are made three times per year at mid- June, end of July and mid-September by a volunteer team.

Results clearly show that Loon Lake is impaired. The lake's maximum depth is a little over 100 feet. Beginning with stratification in the Spring and lasting until Fall turnover there is insufficient (less than 4 milligrams per liter} dissolved oxygen below a depth of 50 feet to sustain aquatic life (other than bacterial). This impairment has existed throughout the life of the monitoring program and shows no significant change. This impairment has resulted in almost total loss of the Mackinaw fishery and significant depletion of the Kokanee fishery. The impairment, if allowed to continue or become more dire, it will result in continued pollution moving slowly toward the surface and increased loss of recreational and real value.

Stevens County's current proposal ignores this impairment in setting developmental standards. The proposed reduction by 25 to 50% of the standard shoreline buffer makes no attempt to control or mitigate lakeside development or redevelopment which will inevitably lead to additional lot coverage by impervious surfaces thereby increasing contamination by runoff to the lake. These proposed standard shoreline buffers are not supported by current, accurate and complete technical information and do not protect the lake. The County's proposal should either exempt Loon Lake from being affected by these impractical and extremely dangerous standards or a serious scientific study of the entire subject should be entertained with a view toward the establishment of a set of standards that protect ours and Stevens County's precious waters.

## BILL & JAN SHAWL WETLAND PROTECTION PROJECT - SOON TO BEGIN

## MORGAN WOOD FIRE REDUCTION & HEALTHY FOREST WORK UNDERWAY

By Jerry Kuntz

Loon Lake Land Conservancy Board member & North Shore Drive Resident

In about 4-6 weeks, Morgan Wood will look a lot like Mackinaw Woods (across the highway from the new fire station) ...look and you'll have a glimpse into the beauty of a renewed and fire wise

forest for all of us to enjoy.

Work began the last week of April and should be complete near the middle of June. Selective cutting of "some" larger trees and the droughted and bark beetle killed dead trees will leave most of the larger, medium, and smaller healthy trees. When the work is done, Morgan Wood will have stronger, more resilient trees able to better push out future bark beetle infestations which can kill ALL the trees in an area and make fire danger a serious concern.

Over 75 donors in the Morgan Park and North Shore neighborhood have helped to make this work possible under the stewardship of the Loon Lake Land Conservancy, owners of this 40-acre parcel. These donors financially supported this work to protect our neighborhoods from fire while renewing a wonderful woodland used daily by numerous walkers, dog owners, cyclists, and others who enjoy the tranquility and beauty of this 40-acre parcel.

In addition to local donors, the Department of Natural Resources for the state of Washington is providing matching dollars and supervision to achieve this more fire wise forest by guiding the work using modern best forest practices:

- 1) ...trees need to be spaced approx. 14 feet apart at the crown to prevent fire from jumping across the tops of trees into our Loon Lake residential neighborhoods;
- 2) ...trees need to be pruned up about 12' from the ground to prevent fire from laddering up to the crown;
- 3) ...masticating/mulching of all the low limbs and brush will occur to provide more moisture retention for all remaining large, medium, and smaller trees to stave off drought;
- 4) ...some groupings of small trees and some dead snags will be left as wildlife shelters and habitat;

The Conservancy is choosing a stronger forest for the next many, many years...rather than a droughted, dead, dying forest, and huge fire hazard next to hundreds of our homes. Thanks again to all who have provided support and encouragement to get this work completed.

By Jerry Kuntz

Loon Lake Land Conservancy Board member & North Shore Drive Resident

Last year the purchase of 390 feet of waterfront wetland and the 22 acres of woods behind it was announced by the Loon Lake Land Conservancy. This is a vital piece of remaining wetland which works to filter and cleanse lake water while its uplands filter hillside run-off into the lake. For all of us who love Loon Lake and want it to remain clean and useable for swimming, fishing, boating, and all our recreational use, protecting these and other wetlands and surrounding woodlands is critical to saving our lake from rapid deterioration, algae blooms, and unusable waters.

The property has already been professionally surveyed and corners marked. In the next many months, signage, entry work, trails work, and specific wetland boundary surveying and marking will occur. This will allow the public to responsibly use this important wetland for recreation and enjoyment into the distant future.

Key members of the Conservancy Board made significant donations and private loans to purchase this wetland initially when the opportunity arose. More than half of the purchase price has been covered thanks to their great generosity and vision.

Over the coming year, the remaining \$40,000 plus will need to be raised from our local Loon Lake community to retire the debt and complete this important preservation work for the future of our lake, each of us, and for our children and grandchildren. If you can make a tax-deductible donation, please contact any member of the LLLC Board or contact our Volunteer Coordinator, Jerry Kuntz, [holymoly1@me.com](mailto:holymoly1@me.com).

---

## SHORE ACRES RESORT

---

By Katy Byrnes

Back in 1946, cabins that had been used to house railroad workers were barged over from the opposite side of the lake and placed on land that would be Shore Acres Resort, the following summer. This is where the story of our family and Shore Acres Resort begins. John Wyatt, the brother of my Great Grandmother, Bertha Elliott, was hired to help place those cabins the summer of 1946. In July of that year, he invited his Nephew James Elliott, and his new bride to spend their honeymoon weekend on the beach at Loon Lake. These two 17-year olds had eloped the previous week, against Bertha's wishes. She had hoped he'd be shipped to Japan with the Air Force, before they could marry. Her plan failed. They were married for 69 years when my Grandmother, Doris Elliott passed away in Oct. of 2016.

Fast forward to the summer of 1972; my husband, Jim was just 9 months old when his dad parked a trailer at Shore Acres Resort. One trailer or another stayed there until 2007. Jim and his siblings spent every summer on the beach, playing, swimming and making friends. Jim's younger sister, Lizzie lived at Shore Acres Estates from May of 2015 until March of 2017, when she was tragically killed on Highway 395, just north of Deer Park. She was on her way home to Loon Lake.

Jim and I (along with Jim's dad, Dave) took over ownership on April 1<sup>st</sup>. We have a blended family of 8 kids and are thrilled to be trusted with the task of making Shore Acres Resort a place for families to come and make memories for generations to come. We hope to invite everyone in the community to come and enjoy all we have to offer – those rustic cabins, RV sites, a walk-up café with great food, a general store with ice cream, candy, iced coffee and souvenir apparel. We also have boat rentals, paddle boats, bikes, canoes and a Pontoon Boat! Please join us on June 1, 2019 from noon to 5:00 for our Grand Re-Opening. There will be Free hot dogs, and ice cream, free day use, and a raffle benefitting the Loon Lake Food Bank. We'll see you at the Lake!

---

## GRANITE POINT PARK SUMMER ACTIVITIES

---

By Joseph Ferraro

- Church by the Bay on Sundays [at 9:30 am](#), starting Memorial Day weekend.
- Yoga on Saturdays [at 10:00 am](#) starting in June.

Both are free for our neighbors around Loon Lake. Afterwards, please stop by the store and enjoy breakfast or lunch.

---

## LOONSDAY

---

By Trish Schwartz

Join us for the 36<sup>th</sup> annual Loonsday 5-mile walk/run which will be held on Saturday June 1st, 2019 at 9:00AM. The walk begins and ends at the Historical Old Schoolhouse, 4000 Colville Rd, Loon Lake WA.

The walk was first started 36 years ago when some local ladies decided rather than participating in Bloomsday, they would start their own walk. Loon Lake Property Association donated the first \$500 to get the ball rolling - and the walk has been going on every year since. Proceeds are donated to community projects ranging from school books for Loon Lake Elementary, donations to the Fire Department and EMS, and improvements to Loon Lake Schoolhouse. Amazing things happen when you get involved in your community.

This is a fun, not timed walk/run course that has a section along beautiful Loon Lake and is great for the family. You can walk/run all or part of it. All ages and abilities are welcome including strollers and dogs on leashes. Please note that there is a short section of unpaved road as part of the route. There will be two water stations for humans and dogs alike and garage sales along the route will entice you during the walk or you can revisit them afterwards. Also, on this day – the new owners of Shore Acres Resort are having a grand re-opening 12PM-5PM offering live music, free hot dogs, prizes, free day use and so much more. Jim and Katy Byrnes will be happy to meet all their new neighbors.

Signup forms are available online at [www.loons.org/loonsday.html](http://www.loons.org/loonsday.html), Loon Lake Post Office, Library, 2 Loons Distillery, Shore Acres Resort or we can email you a form by sending a request to [loonsday1@gmail.com](mailto:loonsday1@gmail.com) or call Trish 509-998-0440.

---

## LOON LAKE/DEER LAKE CHIPPER DAYS

---

By Lee Evans

2019 will be the 4<sup>th</sup> year of the Loon Lake / Deer Lake Property Owners Association combined efforts in organizing and maiming the local Chipper Day activities. Chipper Day is a Stevens Co. sponsored program allowing the surrounding community to bring yard debris, leaves limbs, pine needles and other organic matter to a common area to be chipped. The Chipper Day location is just north of Baldwin's Lumber on Agar Road. Stevens County Solid Waste Department will provide an employee and a front-end loader to push all debris to one common pile thru the course of the collection day to maintain a clear and safe area for the public to unload. Chipper Day has been a great cost-effective alternative to burning or hauling to the transfer station. We anticipate Chipper Days will again be very popular and very busy. The disposal fee is \$10 per load with a maximum of \$20 for truck and trailer. The proceeds for this event will support one of our local volunteer organization. It is our goal to have volunteers safely assist in unloading each vehicle or trailer as they arrive. The vacant lot is designed with an entrance and exit driveway to help with traffic flow. The Chipper Day site will only be open and available to accept debris on collection day during the hours of 9:00AM to 3:00PM absolutely no garbage, lumber, metal or plastic. Chipper Day information will also available on the LLPOA and DLPOA websites loonlakepoa.net and dlpoa.com and the Loon Lake/Deer Lake local networking site Nextdoor. If you are not a member of Nextdoor please join this a great way to keep up with events in our local community.

---

### CHIPPER DAYS

JUNE 1, 2019 AND OCTOBER 19, 2019

NORTH OF BALDWIN'S LUMBER ON AGAR ROAD

9:00AM TO 3:00PM

---

## DOCK DEMOLITION

---

By Lee Evans

The "Dock Demolition" has been an important activity that the LLPOA has provided for over twenty years. Conditions for its operation have changed dramatically over the years as burning is no longer acceptable. As a result, we must now pay for disposal of all materials. We have had a problem in the past of many docks being dropped off without being identified by the owner. Therefore, the owners are not paying the disposal fee and the project is losing money.

In order to address these new challenges, we are proposing that you register your dock for the demolition to help us in our planning process. The disposal fee will be \$4 per foot of the dock if you deliver it to the work area. (On Demo Day) We would also offer to pick dock up at your property for an additional charge of \$50 per dock. Payment must be made at the time of pickup.

Removing the old docks from the lake has been a priority for the LLPOA for many years with scores of volunteers helping with this process. Thank you in advance for your help in getting this important activity back on track. Please contact any board member or visit the loonlakepoa.org for more information.

Thanks again to Mark Whittaker the Dock Demolition Chairperson. Mark has overseen this important program for the last several years. Volunteers are always needed for this activity. If you have been a member of the crew in the past thank you and please consider volunteering again this year.

If you have a dock to remove from the lake or wish to volunteer, please contact Mark Whittaker 509-954-5048 or Email : [markw@mawcpa.com](mailto:markw@mawcpa.com)

---

### DOCK DEMOLITION DAY

JUNE 22, 2019

WASHINGTON STATE FISH AND GAME PUBLIC LAUNCH

8:00 AM TO 1:00 PM

---

## 4<sup>TH</sup> OF JULY BOAT PARADE

---

Join us for our annual 4<sup>th</sup> of July boat parade at Loon Lake!

Registration for the parade opens at 12:30pm in Cedar Beau Bay - southeast end of the lake.

Look for the pontoon boat marked **"Registration Boat"**.

Prizes will be awarded to four or five of the most creative boats/floats -if registered prior to Parade.

Celebrate our nation's holiday in style and win a prize while doing it!

Parade begins at 1pm! See you on the lake!

---

### 4<sup>TH</sup> OF JULY BOAT PARADE

12:30 PM CEDAR BEAU BAY REGISTRATION

1:00 PM – BOAT PARADE START

---

## 2019 LLPOA FIREWORK SHOW JULY 5<sup>TH</sup>

---

By Lee Evans

The Loon Lake Property Owners July 5<sup>th</sup> Fireworks show is a go for 2019. Several events over the last year has helped confirm and aided this decision. The generous donation by LLPOA board members Barry and Micki Smith for the use of their personal 12'x40' dock to be used for this year's fireworks program. This is the second year the Smiths have volunteered their dock and beach area for the pyro-technicians to set up the program. The financial benefit of not needing to rent a platform from EZ dock has saved the program over \$2,000 in 2018 and 2019. In addition, the volunteer efforts of board members Jon Hastings and Dana Waddell setting up LLPOA Fireworks donations stands at Loonsday Start/Finish line and spent several weekends at the All Seasons Grocery and Hardware parking area.

The success of the over the water Fireworks Show depends on you the members of the LLPOA. Your continued donations over the years have made it possible to enjoy this patriotic and fun event. This year's show will take place on July 5<sup>th</sup> at approximately 10:00 pm. Viewing the show from a boat is becoming popular especially for those who have an obstructed view from their home. However please use caution during the lighting. The request is to stay at least 300 feet from the dock during the show for your safety. This year the pyro-technician with upgraded equipment will be electronically firing the show from a nearby boat. His requirements are line of sight and he will maintain a safe 300 foot distant for him and the crew.

Cancellation of the Fireworks show is always possible as July weather conditions are sometimes unpredictable. Final decisions rest with Fire Dist. 1 Chief Bucy in this matter.

---

FIREWORKS SHOW: FRIDAY JULY 5, 2019

TIME: 10:00 PM

## SPRING IS HERE AT LOON LAKE

---

By Captain Stephan Reckie [stephan.reckie@cgauxnet.us](mailto:stephan.reckie@cgauxnet.us)

Spring is finally here and it's time to put your boat back in the water. The success of your spring boat prep is directly related to the proper winterizing of your engine and marine systems. The better you did for your winter layup, the better your chances are for another great season of trouble-free boating.

It is also important to make also sure that you have the proper boating safety equipment, and in good condition. As I am a member of the US Coast Guard Auxiliary, I would be happy to perform a free, voluntary Vessel Safety Check (VSC), at my dock near Shore Acres Resort, to make sure that you have the proper equipment on-board in case of any emergency on the water.

My suggested spring boat commissioning checklist:

- Before launching your boat, make sure that you have securely installed the drain plug
- Inspect your propeller and outdrive for dings, pitting, cracks and distortion
- Fully charge your battery, and clean all terminals and cable ends
- Inspect the engine compartment, checking for any rodent or winter damage
- Check all fluid levels including engine oil, power steering, power trim reservoirs, and coolant
- Visually inspect all fuel lines for cracking and make sure they are flexible, and clamped
- Check all the control cables, their condition and operation, and the safety/kill switch
- Raise the outboard engine / outdrive to listen for any strange sounds from the trim/tilt system
- As you start your engine for the first time, there should be some smoke that clears from the exhaust from the fogging oil that winterized and coated the spark plugs
- Check for oil pressure if you have a dash gauge, and then look for water running from the exhaust or telltale; if you see none, stop the engine and recheck your hose connections
- Once water is flowing, run your engine just above an idle speed and check your dash gauges
- Check for any for fluid leaks around or under the engine
- Listen carefully for any strange engine noises such as loose belts or hoses
- Check the steering system for tightness or looseness
- Shift into forward, neutral and reverse and listen/feel for anything abnormal
- Test bilge pump and inspect the bilge area (if you have one) for any fluid leaks
- Check flares (expiration date) and fire extinguishers (charge), and replace/recharge as necessary
- Check your life jackets to ensure they are in good condition and that there are enough on board for all potential passengers

In addition, please make sure to visit this site for some very important safety tips <http://bit.ly/loonlakesafeboating>. Also, remember that safe boating, navigation, and operation is the group responsibility of all boaters.

If you have any boating or safety questions, please feel free to contact me. I look forward to seeing you on our Loon Lake having fun and boating safely!

---

## FRIENDS OF THE LOON LAKE LIBRARY

---

By Holly Shamberger

We believe in the power of literacy, community and the love of a good book! Friends of the Loon Lake Library exists to support the "extras" of our library. On the first Friday of every month, we have a used book sale from 10-2 with all proceeds going to promote literacy programs in our area. FLLL is being loaned space temporarily for book sales at 4009 Cedar St. at the Old Loon Lake Fire Station. We welcome shoppers and volunteers for this ongoing fundraiser/community event as there are many ways to help and we are always taking donations of clean used books.

One of the long-range goals of our Friends 501(c)(3) non-profit group is to help our library with physical space. Our library is very small and has a big need for a meeting/gathering room, so all children can participate without disturbing the entire library. This larger area would be for the summer reading program and Tuesday craft club. It would benefit adult programs such as journaling, book clubs, and a meeting room for our library staff and community. Come meet us at the book sale, have a cup of coffee, and support these programs big and small by finding you or your grandchild a good book. You also are invited to go across the street to the library, meet our amazing librarians, and get a library card - they are free!

You may follow us on Facebook at Friends of the Loon Lake Library or contact Holly Shamberger at [hshamberger46@gmail.com](mailto:hshamberger46@gmail.com)
